Note from Internet Publisher: Donald L. Potter

November 23, 2010

On January 26, 2004, I did a “Word Analysis” of the 1983 edition of *Alpha-Phonics* by Samuel L Blumenfeld. I had taught *Alpha-Phonics* since 1993 in public school elementary bilingual classes and in private tutoring. My success with the program showed clearly that it was a very good beginning reading program for both regular and bilingual students. I wanted to know more about the program so I did a detailed word analysis. I retyped the entire *Alpha-Phonics* book and sorted the words into alphabetical order. Visually I deleted all the duplicate words. According to that study there were a total of 6,832 words in *Alpha-Phonics*. After eliminating the duplicates there were 2,722 different words. I was very impressed with the fact that I had been able to teach children to read that many words in a single school year. At that time, I was unaware that there was a later, expanded edition of *Alpha-Phonics* called *Blumenfeld’s Alpha-Phonics* to distinguish it from the 1983 program, which is still available from the original publisher.

Mr. Blumenfeld send me a copy of the 1997/2005 edition in 2005. I have been using the new edition in my classroom since then. I was curious about the differences between the two editions so I first did a lesson-by-lesson comparison, which is available on my website.

Recently I decided to do a simple statistical comparison of the two programs. First, I retyped the new edition. Then I put all the word in a single column so I could do a computer sort. This put all the words in alphabetical order. Actually, I did each skill-level one at a time and then figured the number of words taught in each level. I did not do this detailed analysis of the 1983 edition. For that edition I only have total scores. I counted a total of 3,033 different words in the new edition. This gives us 311 new words in the new edition. This is not the entire story of the improvements. The new edition has more sentences and a more refined organization of the spelling-families and irregular words.

I counted words with different meanings but spelled the same as separate words. I also counted plurals, possessives, etc., as separate words. The study is as accurate as I could make it. I am confident the figures are very close to the facts.

Concerning the Dolch Sight Vocabulary List

Eighteen Dolch Basic Sight-Vocabulary services words are not taught in *Blumenfeld's Alpha-Phonics Workbook*. The words are: away, find, yellow, under, every, giving, over, because, before, both, first, goes, its, upon, kind, myself, seven, together. Approximately 95% of the Dolch sight-vocabulary service words are taught with phonics.

Of these 18 service words missing from *Blumenfeld's Alpha-Phonics Workbook*, the following 14 are found in *Blumenfeld's First Readers*: away, find, into, under, every, over, because, before, does, first, its, kind, seven, together – leaving only 4 missing. An impressive 98% of the services words are taught in the *Blumenfeld's Alpha-Phonics Literacy System*.

It is passing strange that reading “experts” and others think that it takes three years to learn all 220 Dolch Sight Vocabulary List words; yet Paul Lukawaski and I have demonstrated over and over again that first-graders can master all 3,033 words in *Blumenfeld's Alpha-Phonics* in a single school year!

The problem with sight-vocabulary is that they treat the English spelling as a form of hieroglyphics to be read as wholes from the meaning of the words without reference to the letters and the sounds they represent. This practice confuses the child as to the fundamental nature of the reading act and leads to the creation of a right-brain, holistic-reflex, whereby the students identify words as configurational wholes assisted by semantic and syntactic clues (a.k.a. guessing). Teaching phonics-first with a linguistic method like *Blumenfeld's Alpha-Phonics* produces significantly higher levels of reading achievement than sight-vocabulary programs or programs that combine sight-word and phonics instruction. All the children that I tutor have received heavy sight-word instruction in the public-school classrooms. They all received Guided-Reading instruction, and what I consider, relatively weak phonics instruction. Not unexpectedly, their handwriting and spelling leaves much to be desired. I mention handwriting because of the hundreds of students I have tutored **none** can write the alphabet fluently or with good legibility due obviously to a lack of direct instruction in that crucial area.

Blumenfeld's Alpha-Phonics Word Count by Skill Levels

Skill Level	Reader	Skills Taught & Mastered	Level Count	Cumulative Count
Level 1	First Reader 1	Short ä, 1-letter consonants, ck, qu	102	102
Level 2	First Reader 2	All short vowels	345	447
Level 3	First Reader 3	Consonant Digraphs, Contractions, to be, to have	84	531
Level 4	First Reader 4	2-Syllable, short vowel words	95	626
Level 5	First Reader 5	al, all, final consonant blends, ng, ing, er.	223	849
Level 6	First Reader 6	More final consonants, 2-syllable words, Initial Blends.	517	1,366
Level 7	First Reader 7	Long ā spellings. au/aw, ar	399	1,765
Level 8	First Reader 8	Long vowels ē & ī. Sentences	459	2,224
Level 9	First Reader 9	ough, gh=f, long vowel ō, oo, ow, ou, oy/oi, Long vowel ū	515	2,739
Level 10	First Readers 10 & 11	Er/ir/or/ur/ear, -le, ph=f, silent letters, y=ī. etc.	294	3,033

Chart prepared by Donald. L. Potter on November 23, 2010.

It is an interesting and informative to compare the ambitious *Blumenfeld's Alpha-Phonics' Scope-and-Sequence* with the less ambitious scope-and-sequence for the typical first-grade reading or phonics program.

Common sense would tell us that to expect students to read first-grade literature BEFORE they have completed a comprehensive phonics-first reading program is an open invitation to the development of the unwanted guessing habit. The *Blumenfeld First Readers* are a carefully planned and sequenced set of interesting Readers that are graded from kindergarten through the upper elementary grades, but easily managed by any student competing *Blumenfeld's Alpha-Phonics Primer*. The *First Readers* are entirely decodable following the sequence of the skills development in the program.

I much prefer that student do **not** begin the *Accelerated Reading Program* until **after** they have completed *Blumenfeld's Alpha-Phonics* and demonstrated oral reading mastery of First Readers 1 thru 10.

Concluding Observations

Teaching beginning students to read with *Blumenfeld's Alpha-Phonics* will go a long way toward **preventing** the development of low reading ability, which we choose to designate as “artificially induced whole-word dyslexia.”

For more information on artificially induced whole-word dyslexia, visit the “Education Page” of the www.donpotter.net website where you can read Dr. Samuel L. Blumenfeld’s ground-breaking article, “Can Dyslexia be Artificially Induced in School? Yes, Says Veteran Researcher Edward Miller.”

The *Blumenfeld's Alpha-Phonics* reading program can be purchased from the Chalcedon Foundation. Although quite inexpensive, *Blumenfeld's Alpha-Phonics* is far more effective than many of its expensive rivals. I do not know of a program anywhere that is easier to learn to teach.

I feel that I am qualified to testify first-hand to the effectiveness of *Blumenfeld's Alpha-Phonics* because I taught it successfully for over seven years to elementary public-school classes. I also taught *Alpha-Phonics Workshops* for the teachers of the Ector County Independent School District. Several teachers I trained have praised the effectiveness of the program in their classrooms.

I have even published one year’s *Lesson Plans* for a second-grade bilingual class that I taught here in Odessa. The lesson plans show clearly how I taught the program to beginning readers in a single school year.

I, also, taught *Blumenfeld's Alpha-Phonics* for 13 years at the Odessa Christian School. I now use it in my private tutoring practice.

For a penetrating insight into the psychology of reading, be sure and read the articles by Miss Geraldine Rodgers on my web site: www.donpotter.net. Miss Rodgers, a highly experienced teacher and researcher, explains why that reading programs that teach children to read from the “sounds” produce far better readers than whole-word (Whole Language) programs that teach reading from the “meaning.” There are also essays by Raymond Laurita and Dr. Patrick Groff concerning the dangers of sight-word vocabulary instruction.

I am delighted to announce the publication of the *First Readers Anthology*, containing all of Mr. Blumenfeld’s *First Readers* in a convenient single book edition. It is available from Amazon or can be purchased from your preferred bookseller.

In 2021 I started a “Tutoring Resources” with a special edition of *Blumenfeld's Alpha-Phonics* which I reformatted to go with my free Online audio instruction for each lesson.

Latest update: 2/26/13, 1/23/21. 9/21/21.

Addendum

Blumenfeld's Alpha-Phonics Sentence Count

Skill Level	Lessons	Skills Taught & Mastered	Sentence Count	Cumulative Sentence Count
Level 1	1 - 14	Short ä, 1-letter consonants, ck, qu	26	26
Level 2	15 - 28	All short vowels	91	117
Level 3	29 - 37	Consonant Digraphs, Contr. to be, to have	47	164
Level 4	38 - 39	2-Syllable, short vowel words	15	179
Level 5	40 - 49	al, all, final consonant blends, ng, ing, er.	78	257
Level 6	50 - 71	More final consonants, 2-syllable words, Initial Blends.	29	286
Level 7	72 - 86	Long ā spellings. au/aw, ar	73	359
Level 8	87 - 100	Long vowels ē & ī. Sentences	135	494
Level 9	101 - 117	ough, gh=f, long vowel ō, oo, ow, ou, oy/oi, Long vowel ū	185	679
Level 10	117 - 128	Er/ir/or/ur/ear, -le, ph=f, silent letters, y=ī. etc.	44	723

The sentence count was completed on December 27, 2010.

This study is based on the 1997/2005 editions of *Blumenfeld's Alpha-Phonics*. One of the beauties of *Blumenfeld's Alpha-Phonics* is that the sentences give the students ample opportunity to practice their decoding skills with well-constructed sentences. The sentences in each level are 100% decodable according to the phonics skills taught to that level. This means that students are NEVER ask to read any words they have not been previously taught with decoding, cursive handwriting, and oral spelling. Guessing is totally avoided with this program.

Mr. Blumenfeld has produced a series of eleven readers for his program: one reader for each of the phonics levels and one little book of poems.

Mr. Blumenfeld passed away on June 1, 2015 in Waltham, MA.

Blumenfeld's Alpha-Phonics Workbook and *Blumenfeld's Alpha-Phonics Instruction Manual* can be downloaded the following links. Published on January 23, 2021 by Mr. Donald L. Potter.
