They said that it would be a great pleasure to give every piece of gold to their dad, who could buy any car with it.

Note from Internet Publisher: Donald L. Potter

October 26, 2011

I would like to thank Mrs. Elizabeth Brown for writing these little decodable stories to go with Hazel Loring’s 1980 Reading Made Easy with Blend Phonics for First Grade. Mrs. Brown sent me the stories back in February of 2010 to use with my Blend Phonics students. I added the questions and spelling words on December 19, 2011.

Mrs. Brown’s website is www.thephonicpage.org.

The stories add spice and interest to the task of learning to read with phonics-first. Since it is crucial for student to learn to decode BEFORE reading from connected text in order to avoid development of the whole-word reading reflex, Mrs. Brown has wisely included the phonics lessons just BEFORE the stories. This makes the program completely self-contained in this document.

I noticed that there were no long vowels in open syllable spelling patterns in the original Blend Phonics so I added Unit 46. It is interesting that many beginning phonics programs do not teach this pattern. Their addition will strengthen this already excellent program.

I recommend discussing the stories with the students to help them develop their ability to recall and understand what they read. I have added four sample comprehension questions at the end of each story to encourage the development of attention. Notice that the stories are perfectly decodable rather than predictable. Our goal is to eliminate guessing, not encourage it.

A special thanks goes to my many tutoring students, who helped me detect errors and make various and sundry improvements to the program.

The stories in the form of individual stapled booklets are still available for free download. The Unit 47 (Story 62) introduces the 37 Dolch Sight List Words that were not explicitly taught in Blend Phonics. Students who can read all 62 Blend Phonics Stories will be highly proficiency in reading and spelling all 220 Dolch Sight Vocabulary Words. There is no valid reason for teaching any so-called sight-words by whole-word memorization. They only serve to confuse the students.

Student who have mastered Blend Phonics will be ready to move ahead to Beyond Blend Phonics, which teaches Homonyms, Anglo-Saxon prefixes and suffixes, Latin prefixes, suffixes, and roots, and Greek combining forms. Beyond Blend Phonics will build students vocabulary and help them decode more advanced polysyllable words by studying the languages of origin.

Blend Phonics Lessons and Stories have proven highly successful in teach student of all ages to read without guessing. The 6x9 paperback can be purchased for $10.00 at the URL below.

The Phonovisual Sound Pictures are in parenthesis. The two Phonovisual Charts (Consonants & Vowels) form a universal method for teaching the sound-so-symbol associations of written English. In constant use since 1942, they are a time-tested method for teaching the phonemic awareness and phonics side of reading. They can be used successfully with any phonics, whole-word reading series. The Charts are reviewed daily at the beginning of each Blend Phonics tutoring session. I also use the Phonovisual Flashcards.

Blend Phonics is a systematic, sequential, universal, multi-sensory phonics-encoding program that teaches automatic decoding linked with meaning. Coupling the scientifically organized Phonovisual Charts and the Blend Phonics directional guidance technique forms a powerful combination that is easy to teach and leads to success for all students.

Sample Phonovisual Charts

Explanation of Scientific Organization of Charts

Consonant Chart: The top of the chart starts at the front of the mouth and goes to the back going down the column. The first column (p, wh, f, th, t, s, sh, ch, k, h) are unvoiced consonants (Quiet Cousins). The second column (b, w, v, th, d, z, j, g) represents voiced consonants (Noisy Cousins). The third column (m, n, ng) are nasals (Singing Cousins). The column on the right (qu, l, r, y, x) relates to the consonants to the left according to points of articulation (Neighbors).

Vowel Chart: Top row are long vowels spellings. Second row are short vowel spellings. The vowels below the short vowel row are called “other vowels.” The small print represents secondary spellings.

Color Coded Large Wall Charts, Small Student Charts, and Flashcards can be ordered from www.phonovisual.org. They are a useful aid to teaching the sound-to-symbol correspondences.

The Ten Un-Decodable Words in Blend Phonics Stories

a by do lived who pull have put the to

In most reading programs, these words are called *sight words*. Actually, the words are only partially un-decodable since the consonants have their regular sound.
